Tibor Bálint

Software Engineer · Frontend-leaning · full-stack capable

PROFILE

I build web products that hold up: Angular and React on the front, Node and C# behind it, and tests that say what “done” means.

By day I work on a production fintech app at PaySpot. On the side I ship small businesses’ shops and sites end to end — from Figma to Docker.

EXPERIENCE

Freelance developer
Sept 2026 – present

Dušan Selaković’s agency · Remote

- Union-Medic: a bilingual Next.js site for a pharmaceutical company, from Figma to Docker.
- 61 pull requests in the first engagement, each with tests and a written rationale.

Case study: Union-Medic

Founder
Feb 2024 – present

Kafe za Vas · Novi Bečej, Serbia

- Built the shop, the API and the admin myself: catalogue sync, pricing, orders, shipping.
- Run the business side too: purchasing from the UK supplier, customer contact, deliveries.

Case study: Kafe za Vas

Medior Software Developer
Feb 2023 – present

PaySpot d.o.o. · Novi Sad, Serbia

- Owned core features end to end and contributed to architecture decisions across the app.
- Helped start a greenfield company app from (almost) day one.
- Led a full UI refresh: layout, styling, reusable components and consistency.
- Built a Scrum reporting system used in day-to-day planning.

Case study: PaySpot

Quality Assurance Engineer
Oct 2021 – Sept 2022

Zeto EU Kft. · Szeged, Hungary

- Automated documentation with custom Google Apps Script functions, then tested and validated them.
- Built an electronic inventory system.

Translator & Social Media Manager
Jul 2020 – Jun 2022

Ovation BBDO · Belgrade, Serbia

- Translated advertising from English to Hungarian.
- Managed communities and wrote monthly metric reports.

SELECTED PROJECTS

Vinted Package Tracker
Sept 2026 – present

Sole developer, full stack

Turned a spreadsheet into a real app that tracks 150+ resale orders for a two-person business, on phones, with alerts.

TypeScript · Node.js · SQL & Prisma · React · Third-party integrations · Validation & guards

LOOKING FOR

WORK
Freelance projects first; the right long-term role is welcome too.

WHERE
Remote first, internationally too. Hybrid up to two days a week in Novi Sad, Subotica or Belgrade.

RELOCATION
Not relocating — settled in Novi Bečej.

CAN START
About one month’s notice.

SKILLS

FRONTEND
TypeScript, Angular, React, Next.js, CSS architecture, Client state & data, Internationalisation, Accessibility

BACKEND & DATA
Node.js, SQL & Prisma, Third-party integrations, Google Apps Script

QUALITY
Playwright, Visual regression, Unit testing, Validation & guards, QA engineering

DELIVERY
CI pipelines, Hosting & ops, SEO & performance

CRAFT & PEOPLE
Design systems, Figma to code, Scrum delivery, Mentoring, Technical writing

LANGUAGES

Hungarian — Native
Serbian — Fluent
English — Fluent

EDUCATION

BSc Computer Science
University of Szeged
Sept 2018 – Jun 2022

Ravioly

Oct 2026 – present

Designer & developer

Redesigned and rebuilt the website of a family pasta maker, with an online shop that fits how their customers like to pay.

Next.js · React · TypeScript · CSS architecture · Validation & guards · Third-party integrations

Crypto Trading Bot

Dec 2025 – present

Sole developer

A personal passion project: software that trades cryptocurrency automatically, with safety limits put first.

Python · Third-party integrations · Validation & guards

Grain & Tide

Sept 2026

Sole developer

An online shop for handmade clocks that takes real payments through PayPal, without running a server.

Next.js · TypeScript · CSS architecture · Third-party integrations · Internationalisation

HOW I WORK

Quality first

Done means verified

Confirm before building

Explain at every level

AI as a power tool
